Customer Selection Guide

Cosmetic Packaging

Products are presented with representative images, customer-focused descriptions, key benefits and major application areas.

Glass Jars

Description: Premium glass jars designed for creams, gels, balms and skincare products. Attractive appearance, product visibility and durable construction support premium cosmetic packaging needs.

Key Benefits: Premium look; Product visibility; Reusable feel; Brand presentation.

Applications: Creams; Balms; Skincare; Cosmetics.

Mist Pumps & Sprays

Description: Mist pumps and spray closures provide smooth, controlled dispensing for liquids. Suitable for perfumes, sanitizers, skincare sprays and personal care packaging.

Key Benefits: Controlled spray; Smooth dispensing; Neat application; Packaging upgrade.

Applications: Perfumes; Sanitizers; Cosmetics; Personal care.

PET Bottles

Description: Lightweight PET bottles offer clarity, strength and practical handling for cosmetics and personal care liquids. Suitable for attractive, durable and cost-efficient packaging.

Key Benefits: Lightweight; Transparent; Durable; Cost effective.

Applications: Lotions; Shampoos; Cosmetics; Home care.

Home Care Bottles

Description: Home care bottles are designed for detergents, cleaners and household liquid products. Strong construction supports secure filling, handling and everyday consumer use.

Key Benefits: Strong body; Secure storage; Practical design; Bulk options.

Applications: Cleaners; Detergents; Home care; Industrial liquids.

HDPE PLASTIC

HDPE Bottles

Description: HDPE bottles provide excellent strength and chemical resistance for personal care and industrial liquids. Suitable for durable packaging requires safe storage and easy handling.

Key Benefits: Chemical resistant; Durable; Lightweight; Reliable storage.

Applications: Chemicals; Personal care; Cleaners; Industrial liquids.

Tubes

Description: Cosmetic tubes offer convenient dispensing and attractive packaging for creams, gels and lotions. Flexible body supports easy application and controlled product use.

Key Benefits: Easy dispensing; Attractive look; Portable; User friendly.

Applications: Creams; Gels; Lotions; Beauty products.

Comb Applicator

Description: Comb applicator bottles enable controlled application of hair oils, treatments and formulations. Integrated comb design helps distribute products evenly and conveniently.

Key Benefits: Controlled application; Comb design; Convenient use; Hair care ready.

Applications: Hair oils; Treatments; Salon products; Personal care.

Roll On Bottle

Description: Roll-on bottles provide smooth, controlled application for perfumes, deodorants and essential oils. Compact format is ideal for personal care and travel-size packaging.

Key Benefits: Controlled rolling; Compact size; Easy use; Leak-conscious design.

Applications: Perfumes; Deodorants; Essential oils; Travel packs.

Sample Bottle

Description: Sample bottles are compact packaging solutions for product trials, promotions and travel-size offerings. Ideal for brands needing small-volume, professional sample presentation.

Key Benefits: Compact; Promotional use; Travel friendly; Cost effective.

Applications: Samples; Promotions; Cosmetics; Product testing.
