Customer Selection Guide

Food and Kitchen Industry Products

Products are presented with representative images, customer-focused descriptions, key benefits and major application areas.

3 Ply Mask

Description: High-quality disposable face mask designed for protection against dust, droplets and airborne particles. Lightweight layers, soft ear loops and breathable material make it suitable for regular workplace use.

Key Benefits: Comfortable fit; Breathable protection; Disposable hygiene; Bulk supply ready.

Applications: Food processing; Factories; Hospitals; General safety.

Nitrile Gloves

Description: Powder-free nitrile gloves offering excellent puncture resistance, chemical protection and superior grip. Ideal for high-hygiene environments requiring reliable hand safety and latex-free user comfort.

Key Benefits: Latex-free; Chemical resistant; Strong grip; Puncture protection.

Applications: Food handling; Laboratories; Pharma units; Industrial operations.

Poly Gloves

Description: Economical disposable poly gloves ideal for quick food handling, serving and light-duty hygiene tasks. Easy to wear and replace, making them suitable for high-volume operations.

Key Benefits: Cost effective; Easy disposal; Lightweight; Hygienic handling.

Applications: Canteens; Food counters; Catering; Packaging lines.

Latex Gloves

Description: Flexible latex gloves provide excellent tactile sensitivity, comfort and dependable protection. Suitable for cleaning, food preparation and general operational tasks where grip and control are important.

Key Benefits: Flexible fit; Good sensitivity; Reliable grip; Comfortable wear.

Applications: Food prep; Cleaning; Inspection; General handling.

Household Gloves

Description: Household gloves designed to protect hands during cleaning and washing tasks. Made from durable materials for comfort, grip, and reliable protection against water and cleaning agents.

Key Benefits: Hand protection; Reusable; Comfortable fit; Chemical resistant.

Applications: Dishwashing; Household cleaning; Bathroom sanitation; Laundry work; Butcher house.

Poly Sleeves

Description: Lightweight polyethylene sleeve covers designed to provide hygienic arm protection against dirt, moisture, and light splashes. Ideal for maintaining cleanliness in food processing and industrial environments.

Key Benefits: Waterproof; Disposable; Hygienic protection; Lightweight and comfortable.

Applications: Food processing; Butcher house; Meat handling; Cleaning operations; Packaging areas; Industrial hygiene.

Bouffant Cap

Description: Disposable bouffant cap designed to prevent hair contamination in controlled areas. Lightweight non-woven material provides comfort while supporting hygiene standards in food and production facilities.

Key Benefits: Hair control; Lightweight; Disposable; Hygiene compliant.

Applications: Food units; Pharma areas; Visitors; Clean zones.

Poly Shoe Cover

Description: Water-resistant poly shoe cover helps reduce dirt, dust and external contamination entering clean work areas. Suitable for visitors, staff and controlled production environments.

Key Benefits: Water resistant; Easy wearing; Area protection; Disposable use.

Applications: Food plants; Clean areas; Labs; Visitor entry.

Non-Woven Shoe Cover

Description: Breathable non-woven shoe cover provides practical footwear protection for hygienic zones. It supports contamination control while offering better comfort for extended movement.

Key Benefits: Breathable material; Dust control; Comfortable; Hygienic.

Applications: Production floors; Hospitals; Labs; Cleanrooms.

Medical Apron

Description: Lightweight protective apron designed to shield garments from stains, splashes and contamination. Suitable for medical, food processing and sanitation teams requiring practical everyday protection.

Key Benefits: Splash protection; Lightweight; Easy disposal; Workwear safety.

Applications: Food processing; Cleaning; Healthcare; Sanitation teams.

Poly Disposable Apron

Description: Waterproof disposable apron made for food handling, washing, cleaning and wet-area operations. Provides effective body protection while maintaining hygiene and convenience.

Key Benefits: Waterproof; Hygienic; Single use; Cost effective.

Applications: Kitchens; Food plants; Cleaning; Packaging areas.

Disposable Lab Coat

Description: Disposable lab coat provides clean protective coverage for staff and visitors in controlled environments. Comfortable design helps maintain workplace hygiene without reusable garment maintenance.

Key Benefits: Clean coverage; Visitor friendly; Disposable; Comfortable fit.

Applications: Labs; Food QA; Pharma; Factory visits.

Steel Gloves

Description: Cut-resistant steel mesh gloves designed for high-risk cutting and slicing operations. Provide strong hand protection for food processing, meat handling and industrial cutting applications.

Key Benefits: Cut resistant; Reusable; Strong protection; Industrial grade.

Applications: Meat processing; Cutting areas; Food plants; Industrial safety.

Suma Tabs

Description: Professional sanitizing tablets formulated for efficient disinfection of surfaces, utensils and food-contact areas. Convenient dosing helps maintain hygiene standards in commercial kitchens and processing units.

Key Benefits: Easy dosing; Effective sanitizing; Food-area suitable; Operational hygiene.

Applications: Kitchens; Food plants; Catering; Surface disinfection.

Garbage Bag

Description: Durable garbage bags designed for clean and efficient waste collection in offices, kitchens and industrial facilities. Available for daily disposal, housekeeping and bulk waste management requirements.

Key Benefits: Strong hold; Leak control; Multiple sizes; Easy disposal.

Applications: Housekeeping; Canteens; Offices; Industrial waste.

Beard Mask

Description: Disposable beard mask controls facial hair contamination in food, pharma and clean manufacturing environments. Lightweight material provides comfort while supporting hygiene compliance.

Key Benefits: Facial hair control; Lightweight; Disposable; Compliance support.

Applications: Food plants; Pharma; Cleanrooms; Visitor hygiene.

Cling Wrap

Description: Food-grade cling wrap helps preserve freshness and protect ingredients from contamination. Clear flexible film supports hygienic storage, covering and packing in kitchens and food service areas.

Key Benefits: Food safe; Freshness support; Transparent; Flexible wrapping.

Applications: Kitchens; Catering; Food storage; Retail counters.

Microfiber 350 GSM

Description: High-quality 350 GSM microfiber cleaning cloth designed for superior dust, dirt, and moisture absorption. Soft, lint-free material ensures effective cleaning without scratching delicate surfaces.

Key Benefits: Highly absorbent; Reusable; Lint free; Soft and durable.

Applications: Household cleaning; Glass cleaning; Kitchen surfaces; Automotive detailing; Industrial cleaning; Butcher house.

Microfiber 600 GSM – DOUBLE COLOR

Description: Premium 600 GSM double-color microfiber cloth designed for heavy-duty cleaning and polishing. Ultra-soft, highly absorbent material effectively removes dust, grease, and moisture without leaving scratches or lint.

Key Benefits: High absorbency; Reusable; Lint free; Soft and durable.

Applications: Surface cleaning; Automotive detailing; Glass cleaning; Food processing areas; Industrial cleaning; Butcher house.

Old Dhoti

Description: Soft cotton old dhoti cloth suitable for wiping, cleaning, polishing, and general maintenance tasks. Highly absorbent and reusable, making it a cost-effective cleaning solution for industrial and household use.

Key Benefits: Highly absorbent; Reusable; Soft cotton; Cost effective.

Applications: Surface cleaning; Equipment wiping; Industrial maintenance; Housekeeping; Food processing ; Butcher house.

Net Roll

Description: High-quality multipurpose net roll designed for packaging, bundling, product protection, and industrial support applications. Durable construction ensures secure handling, improved ventilation, and reliable performance across manufacturing, warehousing, logistics, and storage environments.

Key Benefits: Durable; Lightweight; Easy Handling; Secure Packaging.

Applications: Packaging; Warehousing; Agriculture; Material Handling; Transportation.

Rankem Hydrogen Peroxide

Description: Effective disinfecting solution suitable for surface sanitation and hygiene applications. Supports cleaning routines where controlled disinfection, cleanliness and operational safety are important.

Key Benefits: Disinfection support; Versatile use; Cleaning aid; Hygiene control.

Applications: Facilities; Food areas; Healthcare; Industrial cleaning.

Rankem IPA

Description: Isopropyl Alcohol is a fast-evaporating cleaning solution used for surface cleaning and equipment maintenance. Ideal where residue-free cleaning and quick drying are required.

Key Benefits: Fast drying; Residue-free; Effective cleaner; Multipurpose.

Applications: Electronics; Labs; Maintenance; Surface cleaning.

Sodium Hypochlorite

Description: Effective disinfectant and bleaching solution designed for sanitation, water treatment, and surface cleaning applications. Help maintain hygiene standards across commercial and industrial environments.

Key Benefits: Strong Disinfectant; Fast Acting; Cost Effective; Easy Application.

Applications: Surface Sanitization; Water Treatment; Food Processing Areas; Housekeeping & Industrial Cleaning.

Canteen & Kitchen Supplies

Products are presented with representative images, customer-focused descriptions, key benefits and major application areas.

Wooden Spoon

Description: Eco-friendly wooden spoon suitable for takeaway, catering and food service. Smooth finish, disposable convenience and natural material make it a practical alternative to plastic cutlery.

Key Benefits: Eco-friendly; Disposable; Food service ready; Smooth finish.

Applications: Catering; Takeaway; Canteens; Events.

Wooden Fork

Description: Biodegradable wooden fork designed for reliable disposable food service. Strong enough for regular meals while supporting sustainable and environmentally responsible serving practices.

Key Benefits: Biodegradable; Sturdy design; Plastic alternative; Convenient use.

Applications: Cafeterias; Catering; Events; Food delivery.

Dip Container

Description: Compact dip container ideal for sauces, chutneys, dressings and condiments. Secure design supports portion control, hygienic serving and convenient takeaway packaging.

Key Benefits: Portion control; Hygienic serving; Compact size; Takeaway friendly.

Applications: Restaurants; Cloud kitchens; Catering; Food delivery.

RE-16 Container

Description: Durable food container suitable for meal packing, storage and delivery. Designed for practical handling, neat presentation and secure transportation of prepared food items.

Key Benefits: Secure packing; Food storage; Good presentation; Delivery friendly.

Applications: Meal packing; Canteens; Takeaway; Food delivery.

Check Duster

Description: Absorbent check duster cloth suitable for kitchen wiping, surface cleaning and housekeeping tasks. Durable fabric supports repeated use in everyday commercial cleaning routines.

Key Benefits: Absorbent; Reusable; Easy cleaning; Cost effective.

Applications: Kitchens; Housekeeping; Offices; Canteens.

Yellow Duster

Description: Soft yellow duster cloth designed for dusting, wiping and general cleaning applications. Suitable for offices, kitchens and facility maintenance teams requiring quick surface care.

Key Benefits: Soft texture; Reusable; Effective dusting; General cleaning.

Applications: Offices; Kitchens; Facilities; Housekeeping.

Round Container

Description: Multipurpose round food container for storage, serving and takeaway packaging. Practical design supports convenient handling and organized packing of food items.

Key Benefits: Multipurpose; Food storage; Easy handling; Takeaway ready.

Applications: Canteens; Restaurants; Cloud kitchens; Retail food.

Packing Container

Description: Professional packing container designed for secure food packaging and presentation. Ideal for bulk meal supply, takeaway operations and commercial food delivery requirements.

Key Benefits: Secure closure; Neat packing; Durable; Commercial use.

Applications: Meal delivery; Catering; Restaurants; Food packing.

Cleaning & Housekeeping Products

Products are presented with representative images, customer-focused descriptions, key benefits and major application areas.

Mop

Description: High-absorbency mop designed for effective floor cleaning and daily facility maintenance. Suitable for commercial, industrial and office areas requiring quick and hygienic cleaning performance.

Key Benefits: High absorbency; Easy cleaning; Reusable; Floor hygiene.

Applications: Offices; Factories; Malls; Housekeeping.

Dishwash

Description: Effective dishwashing chemicals formulated to remove grease, stains and food residue from utensils. Suitable for commercial kitchens requiring clean, hygienic and efficient washing operations.

Key Benefits: Grease removal; Hygienic cleaning; Commercial grade; Efficient washing.

Applications: Canteens; Restaurants; Hotels; Food service.

Diversey Product Range

Description: Premium range of professional cleaning, hygiene, and sanitation solutions designed to maintain high cleanliness standards across commercial, industrial, healthcare, and food processing environments.

Key Benefits: Trusted Brand; Effective Cleaning; Hygienic Solutions; Industry Approved.

Applications: Housekeeping; Food Processing; Hospitality; Healthcare; Industrial Cleaning.

Hard Broom

Description: Heavy-duty hard broom designed for rough floors, outdoor areas and industrial sweeping. Strong bristles remove heavy dust, debris and waste efficiently.

Key Benefits: Strong bristles; Heavy-duty; Outdoor use; Durable.

Applications: Factories; Warehouses; Parking areas; Industrial floors.

Soft Broom

Description: Soft broom designed for indoor sweeping and fine dust removal. Lightweight build and gentle bristles make it suitable for daily cleaning of smooth surfaces.

Key Benefits: Fine dust removal; Lightweight; Indoor use; Easy handling.

Applications: Offices; Homes; Showrooms; Indoor floors.

Wiper

Description: Floor wiper designed to remove water quickly and maintain dry, clean surfaces. Suitable for kitchens, wash areas and facility housekeeping teams.

Key Benefits: Quick drying; Water removal; Easy grip; Daily use.

Applications: Kitchens; Washrooms; Factories; Housekeeping.
